

**RAPID7 NEXPOSE ENTERPRISE**

**KEY BENEFITS**

- Gain immediate insight into the security posture of your networks, operating systems, databases and Web applications.
- Automate all steps in your vulnerability management lifecycle from discovery to prioritization and issue resolution.
- Get enterprise-class protection with up-to-date scans for over 14,000 vulnerabilities and 54,500 checks.
- Ensure compliance with policies, auditing guidelines and regulations such as PCI, HIPAA, NERC and FISMA.
- Mitigate risk by identifying and fixing the most critical security threats in your infrastructure with customizable risk scoring
- Increase productivity and reduce resolution times through streamlined step-by-step remediation reports and task delegation
- Integrate with third-party applications and enterprise systems via Rapid7's flexible and extensible XML-based API
- Deploy a complete solution in the way that best meets your enterprise needs, including software, appliance and managed service options.

**NEXPOSE ENTERPRISE EDITION**

Rapid7's flagship product NeXpose Enterprise® is a vulnerability assessment, policy compliance and remediation management solution designed for organizations with large networks which require the highest levels of scalability, performance, customizability and deployment flexibility.

NeXpose Enterprise scans Web applications, databases, networks, operating systems and other software products to locate threats, assess their risk to the environment, and devise a remediation plan to significantly reduce security risks and confidently protect valuable digital assets.

**Rapid7 NeXpose**  
**Unified Vulnerability Management Solution**

**Network Security**

Ensure all systems and network devices have been properly tested for vulnerabilities and mis-configurations to minimize security risks.

**Web Application Security**

Scan the Web application server and all Web applications for serious threats to your environment such as SQL injection and cross-site scripting.

**Database Security**

Identify issues and compliance violations by comprehensively scanning your databases for vulnerabilities.

### EMA ANALYST IMPACT BRIEF

"Rapid7 NeXpose's forward thinking architecture and expert system have allowed it to improve upon current market standards. Rapid7 is starting to shake up the market and raise customer expectations of vulnerability management products."

### ABOUT RAPID7

Rapid7 is the leading provider of unified vulnerability management, compliance, and penetration testing solutions, delivering actionable intelligence about an organization's entire IT environment. Rapid7 offers the only integrated threat management solution that enables organizations to implement and maintain best practices and optimize their network security, Web application security and database security strategies.

Recognized as the fastest growing vulnerability management company in the U.S. by Inc. Magazine, Rapid7 helps leading organizations such as Liz Claiborne, the United States Postal Service, Carnegie Mellon University and Red Bull to mitigate risk and maintain compliance for regulations such as PCI, HIPAA, FISMA, SOX and NERC. Rapid7 also manages the Metasploit Project, the leading open-source penetration testing platform with the world's largest database of public, tested exploits. DS 3/10

### Proven in over 1,000 enterprise deployments, NeXpose Enterprise Edition delivers the following core capabilities:

- **Unrivaled breadth of unified vulnerability scanning** – Scans for over 14,000 vulnerabilities with more than 54,500 vulnerability checks in networks, operating systems, Web applications and databases across a wide range of platforms.
- **Regular vulnerability updates** – Automatically provides vulnerability updates without user intervention. Optional offline activation and update provided.
- **Prioritized risk assessment** - Identifies risk based upon how the vulnerability in one system affects another and customizes the risk scoring system to fit your unique organizational requirements.
- **Comprehensive compliance and policy checks** - Determine if your systems comply with corporate or regulatory policies such as PCI, HIPAA, NERC or FISMA.
- **Robust predefined and customizable reports and dashboards** – Leverage dozens of out-of-the box reports and view executive dashboards to obtain instant insight into your security posture. Create additional reports on the fly.
- **Remediation guidance** - Fix vulnerabilities quickly and easily with the information provided in remediation reports.
- **Accurate scan results** - Delivers accurate scanning results in less time with an expert system that follows a process similar to that used by ethical hackers.
- **Ticketing** - Manages the remediation workflow process with an internal ticketing system and integration to third-party systems.
- **Powerful administration management** – Supports centralized administration for geographically or organizationally dispersed network environments provides role-based access for delegated administration and reporting and integrates with Active Directory and other repositories for role-based groupings.
- **Extensive enterprise integration** – Integrate NeXpose Enterprise with many third-party security, compliance and risk management solutions based on pre-built integrations and NeXpose's XML-based open API.
- **Out-of-the box Metasploit® integration** – Works with the Metasploit Framework to provide remote scan control, exploit identification and automated exploitation functionality to NeXpose users.
- **Strong enterprise-class service and support offerings** - Benefit from many enterprise service and support options including prioritized support, dedicated technical account managers, consulting and training offerings.
- **Flexible deployment models** – Deploy NeXpose Enterprise any way you want, as software, appliance or managed service to meet your unique network scanning needs. Deploy distributed scan engines to achieve the most scalable results.
- **FIPS certified encryption** – Option to run NeXpose in FIPS-mode.
- **Offline activation updates** – Activate and update NeXpose without connecting NeXpose directly to the Internet.
